

QDC for ePTO

Modular SLIM Air Blast Cooling System

ENGINEERING YOUR SUCCESS.

WARNING – USER RESPONSIBILITY

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

This document and other information from Parker-Hannifin Corporation, its subsidiaries and authorized distributors provide product or system options for further investigation by users having technical expertise.

The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.

To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.

Offer of Sale

Introduction

One Stop Shop for Thermal Management

Complex new technologies and components are needed to electrify trucks.

Only compact and modular solutions will resolve the challenges for on-road and off-road trucks with work functions when designing next generation electric vehicles.

Here Parker has the reliable and efficient integrated solution for you. The Water Glycol QDC cooling system is designed to integrate with Parker’s highly efficient GVM Motor in combination with Parker’s GVI Inverters.

This is coupled with an extensive range of hydraulic pumps and filtration. Further design simplification allows integration of other components from Parker’s broad breath of products including, the IQAN control system and integrated sensors.

Challenges

- Space is limited
- ePTO must fit in varied and complex application
- Risk of lifetime reduction, using truck cooling system for ePTO cooling
- Input of pollution and or air
- Harsh condition
- Complexed cooler and pump sizing

Benefits

- System tailored to Parker components.
- Slim design
- Plug and run solution
- Optimized for air free operation
- Heavy brackets
- Fit for rubber dumper
- Ports for sensors and ventilation

Introduction

QDC 006

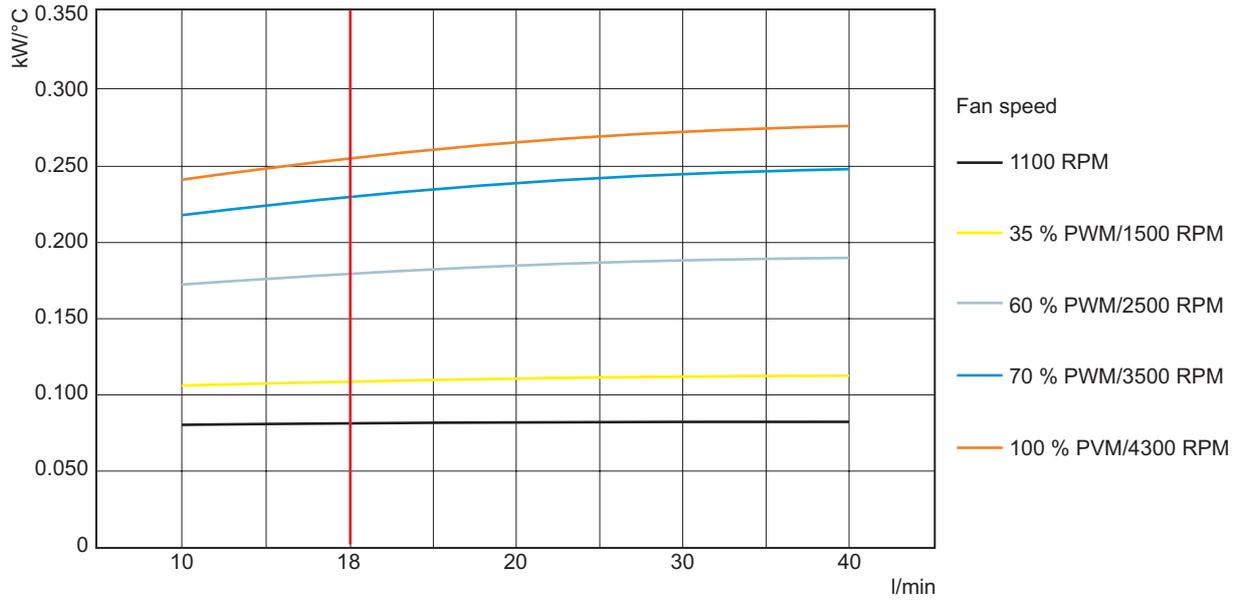

QDC 006 Technical Data

	QDC 006	QDC 006 (S)	QDC 006 (L)	QDC 006 (T)
System	—	Standard pump & tank	Large pump & tank	Only tank
24 VDC	5847006001	5847006500	5847006501	5847006502
12 VDC	5847006002	5847006520	—	5847006522
				

	5847006001	5847006002	5847006500	5847006520
Pressure drop [bar]	0.18 at 100 l/min water Glycol 50 % at 30 °C	0.18 at 100 l/min water Glycol 50 % at 30 °C	0.04 at 40 l/min water glycol 50 % at 30 °C	0.18 at 100 l/min water Glycol 50 % at 30 °C
Max. cooling capacity [kW/°C]	0.29 with water glycol mix 50 % at 4300 rpm at 100 l/min	0,255 with water glycol mix 50 % at 4000 rpm at 100 l/min	0.277 with water glycol mix 50 % at 4300 rpm at 40 l/min	0,24 with water glycol mix 50 % at 4000 rpm at 100 l/min

Dimensions

Accessories

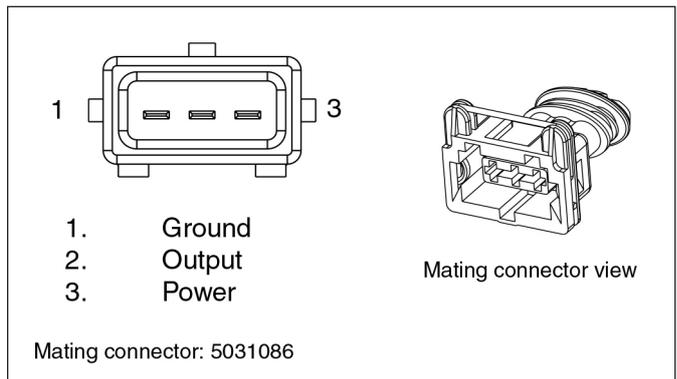

Pressure Sensor 5020026

The IQAN-SP has stainless steel construction for strength. The sensor cells use thin film technology with no internal o-rings or fluid. The high pressure capability makes the sensor very robust and able to withstand vibration.

Characteristics		
Weight	[g]	60
Operating temperature	°C	-40 to 125
Protection		outdoor use
Pressure rating Max	[bar]	100
Pressure rating	[bar]	0-35
G1/4		BSPP
Electrical Connector		AMP JPT
Electrical specifications		
Output at FS3	[VDC]	4.5
Zero output3	[VDC]	0.5
Supply Voltage(Vs)	%	5.0 ±10
VDC4 Current supply	[mA]	Max 12.5 mA
Load resistor Min	[ohm]	5k
Load capacitor Max	[µF]	0.1

Connector Bosch Junior Timer

Accessories

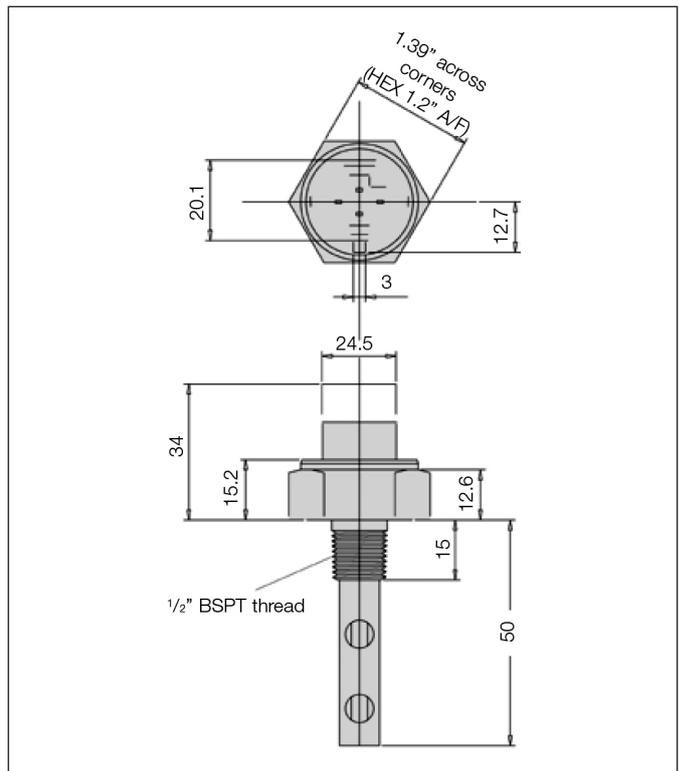

Level Sensor CLS46

The CLS46 Liquid Level Switch is an active device which is designed to give an alarm signal if fluid falls below a preset level. It will only give an output signal after a few seconds of low level to eliminate false alarms due to turbulence. The fact that the CLS46 series has no moving parts and incorporates a built in delay means that it is ideal in applications where mechanically operated switches mis-trigger due to vibration and fluid turbulence.

Electrical rating		
Supply voltage	[VDC]	7-40
Supply current	[mA]	3.0 max. load current: 1.0 A
Alarm delay time	[s]	10.0
Connections		V+: Positive power supply
GND		Negative power supply or GND
Output		Transistor switched to GND on alarm
Body		Connected to ground
Fluid types		Mineral oils / W/G in Validation
Body		Brass
Probe		PTFE
Terminals		SAE CA210 brass, tin plated
Seals		NBR
Environmental ratings max. pressure	[bar]	5.0 (72 PSI)
Temp. ranges: Fluid	[°C]	-40 to +130
Ambient		-40 to +100
Sealing		IP67
Vibration	[g]	6 10-50 Hz (600-3000 rpm)
Shock	[g]	50, 6.3 ms

Dimensions

Accessories

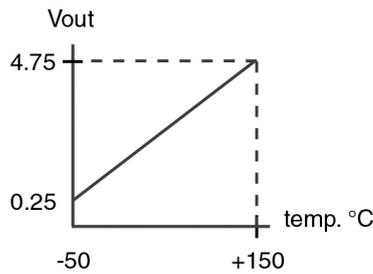

Temperatur Sensor 20073657

The IQAN-ST has stainless steel construction for strength. The PT100 sensor uses thin film technology with internal amplification. All versions of the sensor have high pressure capability. The IQAN-ST is very robust and able to withstand heavy vibrations.

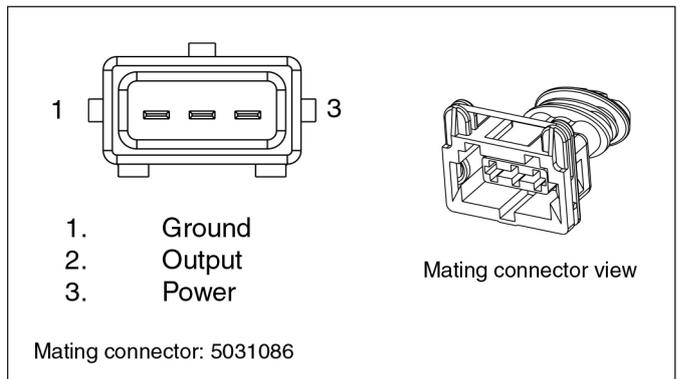

Characteristics		
Weight	[g]	50
Operating temperature	°C	-50 to 150
Protection		Outdoor use
Pressure rating Max		
G (1/4 BSP)	[bar]	700
M (M10)	[bar]	350
U (SAE 6)	[bar]	1000

Temperature vs. output diagram

Connector Bosch Junior Timer

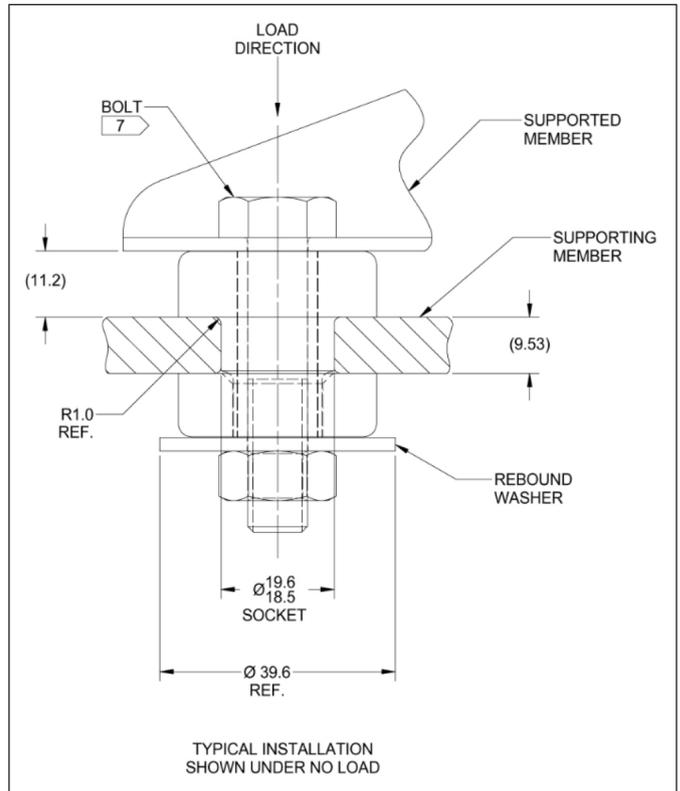

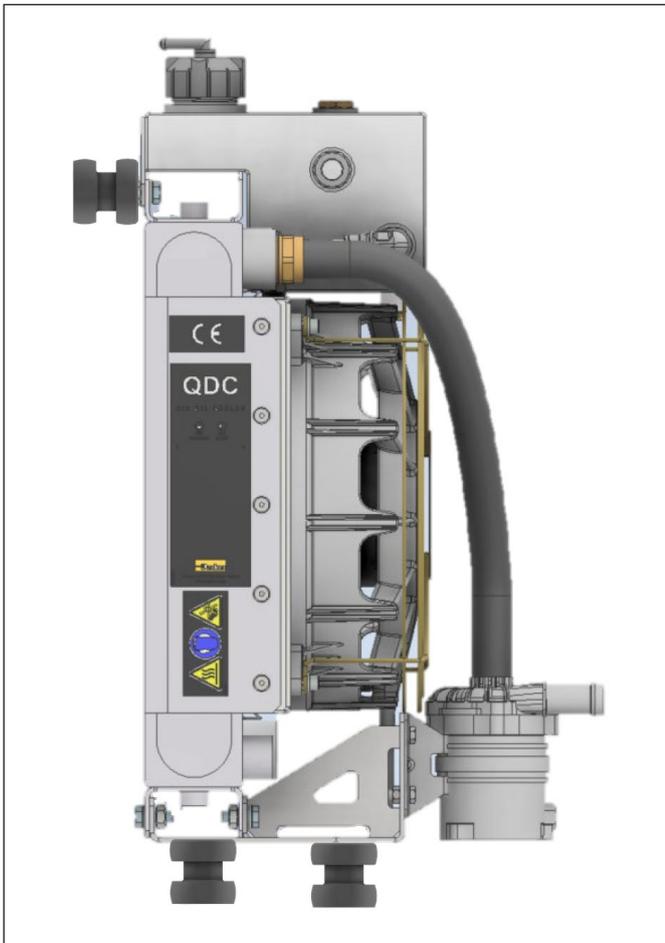

Accessories

Rubber Damper CB-2201-1

Rubber Damper CB-2201-1 series are designed for applications involving severe dynamic forces in the static load direction, as well as the rebound direction. Travel is limited in both directions by rubber in compression that provides snubbing.
